EDUCATION

Gordon College — Wenham, MA
B.S. in Computer Science, expected 2028 — *Aug 2026 - Present*

Korea University of Technology and Education (KOREATECH) — Cheonan, South Korea
Computer Science coursework (transfer) — *Mar 2022 - Feb 2024*

EXPERIENCE

Maternal Care EHR — 2024 - Jun 2026
Founder & Software Engineer — *In partnership with Global Care & KOICA*

- Reduced estimated clinic workflow time by **~25%** by replacing paper prenatal documentation with a Swift/SwiftUI EHR app backed by offline Core Data storage.
- Deployed the app across **8 cities and villages**; designed visit-specific records linked to longitudinal patient histories for continuity of care without reliable internet.
- Refined prenatal checklists, data-entry forms, and patient status tracking through direct clinic observation and staff feedback.
- Built a clinical analytics dashboard aggregating 780 diagnosis and medication records over 3 months, computing frequencies and percentages to surface the top 5 diagnoses and medications.

Seoul National University Hospital (LAMIS) | Code — 2023
Software Engineer — *Seoul, South Korea*

- Reduced DICOM preparation time by ~33% by independently building a Python/PyQt6 desktop app that automated batch de-identification for hospital researchers.
- Fixed missed private-tag removal using pydicom and validated revised parsing against real-world datasets; exported per-series CSV metadata for researcher review.
- Optimized PyQt thread management to address batch-processing overload; automated desktop application deployment with GitHub Actions.

PROJECTS

Revival | App Store | Google Play | Website — Aug 2026 - Present
Founder & Product Engineer

- Built and launched a local-services marketplace on the App Store and Google Play, connecting customers with businesses in Haiti and the Dominican Republic.
- Implemented location- and category-based search, private messaging, and translation API integration for multilingual use.

KOIN Service | Code | Error Convention — Mar 2022 - Jun 2024
Front-End Engineer & Team Lead — *BCSD Labs, KOREATECH*

- Increased code reuse by ~55% by building shared React/TypeScript UI components; led code reviews and mentored developers.
- Reduced errors by ~45% through Recoil-to-Zustand migration and standardized API error handling; authored team conventions for typed errors and Slack reporting.
- Reduced pull-request workflow time by **~25%** by automating GitHub Actions workflows and Slack notifications.

TECHNICAL SKILLS

Languages: Swift, TypeScript, JavaScript, Python
Frameworks & Libraries: SwiftUI, Core Data, React, React Query, Zustand, PyQt6, pydicom, Axios
Tools: Git, GitHub Actions, REST APIs, Vercel

ADDITIONAL

Korean (native), English (professional working proficiency), Haitian Creole (elementary)
Hapkido: 10+ years; assistant instructor; Seoul national team; international competitions (2014-2023)
