

Hana Kim

Software Engineer · Healthcare Technology · Social Impact

+1 829-620-1063 | rlagksk8428@gmail.com | github.com/hanagertrudeKim | linkedin.com/in/hana-gertrude-kim

EDUCATION

Gordon College — <i>B.S., Computer Science</i>	Wenham, MA Incoming Aug 2026
Korea University of Technology and Education (KOREATECH) — <i>B.S., Computer Science</i>	Cheonan, Korea Mar 2022 – Feb 2024

EXPERIENCE

Global Care (KOICA-Partner NGO) <i>Software Engineer</i>	Haiti / Dominican Republic 2024 – Present
■ Maternal Care EHR — iOS App [Distributed via TestFlight] [Primary]	
- Shipped a production iOS EHR app (Swift) tracking 300+ expectant mothers across 6 villages, transforming isolated clinic visits into continuous longitudinal prenatal records - Architected offline-first data sync with full patient histories (BP, gestational age, fetal heart rate, sonography, risk flags), monthly checklists, and Consulted / Waitlist triage to streamline mobile clinic workflows in low-connectivity environments - Established AI-augmented dev workflow (Claude Code, Cursor): AI pair programming, automated test scaffolding, real-time debugging mid-clinic — same-day iteration from nurse feedback, cutting delivery cycles by ~40%	
■ Child Sponsorship Management Platform	
- Built and deployed a React / TypeScript / TailwindCSS platform managing 50+ child profiles with real-time funding dashboard; accelerated UI delivery by 40% — oaktree-ministry.vercel.app - Redesigned donation flow and information hierarchy through iterative user testing with non-technical stakeholders	
Seoul National University Hospital (LAMIS) <i>Software Engineer</i>	Seoul, Korea 2023
Built a cross-platform desktop app (Python + PyQt6) automating DICOM medical-imaging anonymization — deployed in hospital workflow; resolved private-tag compliance gap, processing thousands of files with full audit-log reporting · Docs: notion.site/DICOM-Anonymizer-Docs	

PROJECTS

KOIN Service / Admin V2 / Owner Service — <i>Front-End Engineer & Team Lead</i>	Mar 2022 – Jun 2024
· BCSD Labs, KOREATECH	
- Built and maintained production React / TypeScript campus apps (React-Query, RTK-Query, Zustand, Zod) serving hundreds of daily users in a ~200-engineer student org; led front-end team through sprints, code reviews, and mentoring - Migrated global state Recoil → Zustand; published team-wide npm utility package; automated PR pipeline via GitHub Actions + Slack; unified client-side error handling conventions org-wide - Refactored with Compound Components pattern — eliminated ~30% duplicated logic, cut delivery cycles by ~20–25%	

TECHNICAL SKILLS

Languages:	Swift, JavaScript, TypeScript, Python
Frameworks & Libraries:	SwiftUI, React, React-Query, RTK-Query, Zustand, Zod, React-Hook-Form, TailwindCSS, Electron, PyQt6
Tools & Platforms:	Git, GitHub Actions, REST APIs, Vercel, Claude Code, Cursor (AI pair programming)
Domain Expertise:	Healthcare IT · iOS Development · Front-End Engineering · Medical Data Privacy (DICOM / HIPAA-adjacent)

ADDITIONAL

Languages: Korean (Native) · English (Professional Working Proficiency) · Haitian Creole (Elementary)
Hapkido: 10+ years · Assistant Instructor · Seoul national team internationally (Philippines, Cambodia, 2014–2023)
